

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 101. The concentration of the *Agrobacterium* strain 101 was varied from 10⁵ to 10⁸ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁵ cells of the *Agrobacterium* strain 101. The data were expressed as the mean \pm SD of three independent experiments. The transformation efficiency was significantly higher at 10⁷ cells/ml than at 10⁵ and 10⁶ cells/ml ($P < 0.05$).
